

Customs Essentials

A one day course designed for those who have a basic awareness of export and import procedures but who need to gain a better understanding of customs regimes.

Ideally, delegates need to understand basic procedures before attending this course.

This introductory course is designed for anyone whose work involves customs processes or who want to broaden their knowledge about the basics.

By the end of this course you will be able to:

- Define all Incoterms 2020, their role and responsibility in the terms of sale, with a focus on customs valuation
- Explain how goods are moved between the EU and GB.
- Understand the common special procedures, IP/OP and RGR
- Apply the correct procedure codes (CPC) for the most common regimes
- Research the volumes of the on-line UK Trade Tariff and know how to classify goods accurately
- Complete Duty and VAT calculations
- Describe the options to pay HMRC and how a Deferment account operates
- Explain where all topics covered are declared using CDS

Course Feedback

100% would recommend this course to others

I'm glad I went on this course as I can go into work with more confidence and knowledge.

The trainer made the experience more fun than expected.

Very relaxed which made it more enjoyable and easier to take things on board.
